

SYNOPSIS

(Database Systems and Web (15B11CI312))

TITLE OF PROJECT - *E-Learning Interactive Website*

GROUP MEMBERS DETAILS (Batch -B12)

NAME AND ENROLLMENT NO.-

1. *Bhavya Malik* - 21803002
2. *Avantika Singh* - 21803005
3. *Amogh Bansal* - 21803008
4. *Prerna Sharma* - 21803010

BRIEF INTRODUCTION ABOUT PROJECT-

We have easy access to a plethora of information, all thanks to mobile devices and internet connections. From food delivery to the share market, if we want to learn about anything, we go online. Basically, the internet is like a never-ending book, everything is at our fingertips. But, there is also so much ambiguous information on the internet, and you might not know what is authentic. This is where eLearning websites enter. The eLearning market is estimated to surpass \$243 billion in 2022.

Online learning platforms

These websites follow a “be your own teacher” approach. These platforms serve content remotely. Students get to learn independently, at their own pace while tracking the progress as they move forward. The content is in the form of videos, blogs, PDFs, etc.

What does our project do?

Our website would help the students to find all the popular e-learning resources in one place. It would help them navigate and easily find anything across the internet from which they can learn and grasp knowledge.
